

SKILLS AND COMPETENCES FOR WORK IN INDUSTRY 4.0

The official newsletter of the Erasmus+ funded project "Industry 4.0 Skills"

"INDUSTRY 4.0 SKILLS" FOR ALL

"Skills and Competences for Work in Industry 4.0" is a European project funded by ERASMUS+ Program for the period 2020 – 2022. The main goal of the "Industry 4.0 Skills" project is to provide a comprehensive and useful indication of initiatives, programs, methods and materials concerning the development and self-improvement of personal skills and competences in the transformation in industry.

Our project team is made up of a potent mixture of partners with extensive experience in education and training, creativity and entrepreneurship, business development, financing and innovation management from four European countries:

- INI-Novation, Germany, email: info@ini-novation.com
- WIN, Austria, email: office@wissenschaftsinitiative.at
- INTEGRA, Slovenia, email: office@eu-integra.eu
- QUALED, Slovakia, email: office@qualed.net

ADD YOUR GOOD PRACTICE IN THE CATALOGUE "SKILLS AND COMPETENCES FOR WORK IN INDUSTRY 4.0"

Our mission is to inform about successful examples how to accomplish the transition of labour-intensive work to knowledge-intensive work in industrial environment.

KICK-OFF MEETING OF "INDUSTRY 4.0 SKILLS" PROEJECT

Productive online meting of our project consortium on 13.01.2021

Digitization is increasingly shaping the world of work. Computerization, Big data, Advanced robots, IoT, etc. The technologies can readily substitute labour in a wide range of non-routine cognitive tasks and to perform a broader scope of manual tasks. This will change the nature of work to knowledge orientation.

On our first project meeting, we discussed how effectively to raise awareness about the market need for new competence development and skill adaptations in our four home-countries Austria, Germany, Slovakia and Slovenia

Moreover, our focus will be on collection of good practices as use cases of successful approaches and practices for implementation of vocational training according to the needs of Industry 4.0.

All good practices will be disseminated on our website and will be made publicly available in a special e-Platform.

Furthermore, we created a managed Facebook group as a Forum for all stakeholders interested to share their opinions about the possibilities and obstacles, which the Forth Industrial Revolution brings for the businesses and employed people.

Add your good practice to our Catalogue "Skills and Competences for Work in Industry 4.0". We will share it with the European stakeholders to positively impact the development of skills and competences and to enrich the knowledge of the work forces according to the needs of the companies in the various market segments in Industry 4.0.
